HANGING TIME	125 & 200ml bottles: can be attached directly to a Flocare bottle giving set. Alternatively, feed can be decanted into a sterile reservoir, taking care to handle aseptically at all times. Clean bottle top with an alcohol swab before opening. 500ml bottles: can be attached directly to a Flocare pack giving set. When directly connected to a giving set (aseptically handled, closed system), collapsible bottles have a hanging time of max. 24 hours. If the cap has been removed (used as an open system) then collapsible bottles have a hanging time of max. 8 hours (Infatrini / Infatrini Peptisorb max: 4 hours).														

* Oral Nutritional Supplement (200ml), also suitable for bolus feeding. Optimized for oral intake, different nutritional composition vs tube.

** 14% of real fruit and vegetable ingredients (carrot 5.5%, zucchini 4.5%, apricot 4%): reconstituted carrot from flakes 5.5%, reconstituted zucchini from flakes 4.5% and reconstituted apricot juice and pulp from powder 4.0%

For health care professionals only. Not for distribution to general public. Food for Special Medical Purposes (FSMP). To be used under medical supervision.
